

Curriculum Vitae

Prof.dr. Andrea Fiore was appointed full-time professor in Nanophotonics at the Department of Applied Physics of Eindhoven University of Technology (TU/e) on 1 October 2007.

Andrea Fiore (1970) graduated in Electrical Engineering (1994) and in Physics (1996) at the University of Rome 'La Sapienza'. He gained his PhD in Optics (1997) from the University of Paris XI-Orsay, with a thesis on nonlinear optics in semiconductor heterostructures. He has worked at Thales Research and Technology (Orsay, France), at the University of California, Santa Barbara, at the Italian National Research Council (Rome, Italy), and at the Ecole Polytechnique Fédérale de Lausanne (Switzerland). In October 2007 he was appointed full professor at TU/e. His research interests are in the physics of nanophotonic devices, particularly quantum dot lasers, single-photon sources and superconducting single-photon detectors. He coordinated several national and international projects, including the EU-FP6 'SINPHONIA' project. In addition, he has co-authored over 100 journal publications and three book chapters, and has given around 30 invited talks at international conferences.
